EDUCATION

- Academy of Technology** Hooghly, India
Bachelor of Technology - Computer Science and Engineering; YGPA: 7.96 (Till 5th sem) *July 2023 - June 2027*
Courses: Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases, Object Oriented Programming
- Serampore Union Institution** Serampore, India
Higher Secondary (WBCHSE); Percentage: 71.8% *April 2021 - June 2023*
Relevant Courses: Computer Science
- Chatra Nandalal Institution** Serampore, India
Secondary (WBBSE); Percentage: 83.42% *January 2015 - March 2021*

SKILLS

- Languages:** Python, C, C++, SQL, Bash
- Libraries:** PyTorch, TensorFlow, Numpy, Pandas, FastAPI, Scikit-learn, Streamlit
- Tools/Platforms:** MLFlow, DVC, Dagshub, Docker, GitHub, MySQL, SQLite, MongoDB, Linux, Web, AWS (S3), GCP
- Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- AWS cc AOT** Remote
Tech Lead *December 2025 – Present*
 - Technical Mentorship:** Mentoring 100+ students through the AWS Global Hackathon, providing hands-on guidance for the AWS Platform.
- IEI Students' Chapter CSE AOT** Remote
Convenor *September 2025 – Present*
 - Leadership & Project Management:** Directing chapter operations to execute high-engagement technical events (e.g., competitive programming) and architecting a custom Task Scheduler tool to automate member activity tracking.
- Google Developer Groups on Campus AOT** Remote
Machine Learning Lead *August 2025 – Present*
 - Technical Mentorship & ML Advocacy:** Mentoring 100+ students through the Google Arcade program (GCP) and facilitating campus-wide workshops on Machine Learning and Cloud workflows.

PROJECTS

- SlothOps – Automated Bug Remediation Agent:** [Winner @ Binary S2] Engineered an AI-driven DevOps pipeline detecting crashes via Sentry webhooks and automating root-cause analysis using GPT-4o. Features automated PII redaction, production self-healing via Git reverts, and autonomous creation of staged Draft PRs. Tech: Python, FastAPI, OpenAI, PyGithub, SQLite (March '26)
- GLOF Predictor – Glacial Lake Outburst Flood Prediction:** [Best Innovation @ Hack Technique] Developed a disaster-mitigation ML system to predict glacial floods using environmental data. Features a custom-integrated calling agent for emergency alerts. Tech: Pandas, Scikit-learn, Python, FastAPI (January '26)
- InsurancePRO – Premium Predictor API:** Built and containerized a RESTful API predicting user likelihood to opt for premium insurance plans. Tech: Pandas, Scikit-learn, FastAPI, Docker, Python (November '25) | [GitHub](#)
- Smart Attend – Automated Attendance System:** Developed an AI monitoring system using live camera feeds for real-time facial recognition and attendance logging. Tech: Python, OpenCV, Pandas, Pillow (October '25) | [GitHub](#)
- FireX – Forest Fire Weather Index Prediction:** Built an ML pipeline and Flask web app to predict Fire Weather Index in Algerian forests. Tech: Python, Flask, NumPy, Pandas, Scikit-learn (September '25) | [GitHub](#)

PUBLICATIONS

- Technical Blogs:** Authored articles on *np.random.rand()* vs *randn()* and *fit.transform()* vs *transform()*, explaining statistical concepts and preprocessing best practices. Tech: Python, NumPy, Scikit-learn (September '25)

HONORS AND AWARDS

- Awarded Winners at Binary S2 conducted by Kalyani Government Engineering College - March, 2026
- Awarded Best Innovation at Hack Technique conducted by Technique Polytechnique Institute - January, 2026
- Winner at Uxplore conducted by Academy of Technology - October, 2025
- Winner at Techfiesta'25 conducted by Academy of Technology - June, 2025
- Grand Finalist at Frosthacks - A 48 hours offline hackathon - February, 2025
